WHY VIA?

- Mercedes-Benz® Sprinter chassis
- Infotainment Center with Rand McNally RV GPS
- Available Mobileye® collision avoidance system
- Powered patio awning with LED lighting and metal wrap
- Ultraleather™ furniture
- MCD solar/blackout roller shades
- Froli® Deluxe Sleep System
- Threshold™ Quiet RV entrance door
- Tankless water heater (25P)
Class A Like You’ve Never Seen Before

The Via® redefined the Class A motorhome with the introduction of the Mercedes-Benz® Sprinter Chassis. That original design has been further refined to deliver the fuel economy and smooth performance you’ve come to expect from the Sprinter, with additional headroom and cab room for a more enjoyable ride. The chassis also allows for more interior and exterior storage, and the cab offers additional seat boosters to level the swivel seats with living area. Both 25-foot Via floorplans are loaded with innovation, such as the waterfall countertop and the Deluxe Froli® Sleep System. See what’s possible in a nimble Class A coach with the Winnebago Via.
The Via greets you with carefully selected fabric collections and in-demand features such as LED lighting and MCD solar/blackout roller shades. The 25T offers a moveable pedestal table that can be placed in front of the Flexsteel® Fold N Tumble sofa or the swivel cab seats that turn to create a nice conversation area. If you prefer the versatility of the BenchMark® dinette, select the 25P and enjoy the hidden storage beneath the seats and the quick conversion into a sleeping area. Enjoy all of today’s top shows on the HDTV with an available satellite TV antenna.
The galley design of the Via is all-new in both models, blending the contemporary style you desire with the features you need for life on the road. The waterfall countertop is sure to be a conversation starter in the 25P, along with the stylish glass heat shield above the range and the two-tone cabinet doors. The 25T boasts an open layout with a large galley window so you can enjoy the view while you prepare meals.
The Via is all about options. Choose a corner queen bed in the 25P or opt for the Flex Bed in the 25T that converts from a king bed into two twin beds at your convenience. Add the StudioLoft™ to the cab of either model and you’ll be ready to travel with the entire family. Overnight guests will love the flexible shower in the bathroom, while you’ll appreciate the retractable shower door that self-cleans as it opens.
The Sprinter chassis has perfected Class A cab ergonomics with an additional 17” of headroom and your choice of a driver-side door or additional interior and exterior storage. Mercedes-Benz enhances this fun-to-drive coach with standard safety features such as power mirrors with defrost, a sideview camera system and an available collision avoidance system. The 6” touchscreen monitor incorporates an infotainment system with CD/DVD player, Bluetooth™ connectivity and the Rand McNally GPS for accurate turn-by-turn directions.
The Sprinter chassis gives the Via a distinct appearance, which truly stands out when you select the premium full-body paint. Add polished stainless steel rocker panel trim and additional exterior chrome accents by choosing the available Deluxe Package. A powered patio awning with LED lighting and a metal wrap come standard. High-end details such as the Threshold™ Quiet RV Door and a large compartment with dedicated storage straps for your golf clubs make travel in your Via that much more enjoyable.
Fiberglass Roof  The crowned, one-piece fiberglass roof is backed by a 10-year limited parts-and-labor roof skin warranty.

Thermo-Panel® Sidewalls  By layering fiberglass and high-density block foam insulation with welded aluminum support structures, we create some of the industry’s strongest, most durable and lightweight sidewalls.

E-Coating  An electrodeposition coating helps protect critical steel components.

Embedded Steel  Metal substructures embedded into the sidewall provide solid attachment points to keep cabinets and appliances mounted securely in place.

Solid Framework  Aluminum extruded in our own facility to our exacting standards creates an extremely strong and solid structural framework.

Laser-Cut Tubing  Precision laser cutters create precise joints in structural steel that are stronger and require less welding.

Interlocking Joints  Specially engineered interlocking joints connect the floor, sidewalls and roof where competitors often rely on simple screws to bear the weight.

Every coach—from our smallest Class C to our largest diesel-pusher model—is built to Winnebago’s® legendary SuperStructure® construction design. It’s a process developed and refined over more than 50 years of building some of the strongest, most durable coaches in the industry.
Before rolling out of our factories, every coach undergoes an extensive 113-point inspection. Each coach also passes a high-pressure water test that simulates rain at a rate of 50-inches per hour to check for leaks. During the design process, our computer simulations, physical testing center, and rigorous test track ensure each model is built to last.

At Winnebago, we treat the features you can’t see with the same care as the ones you can. Look in the access panels of some of our competitors’ coaches and you’ll see loose insulation and wires haphazardly strewn about. Winnebago maintains a clean fit and finish throughout so your coach will last for the long haul.

We process and finish key aluminum parts. We rotocast our own plastic components. In fact, we manufacture most of our own parts so they are designed to fit the space, rather than fitting the space to an awkward off-the-shelf component size.

We’re proud of our processes, state-of-the-art facilities, and the people who make Winnebago number one. We invite you to visit our complex in Forest City, Iowa, for a firsthand look at the dedication and technology behind every motorhome we build.

Call (641) 585-6936 or (800) 643-4892 or visit us online at WinnebagoInd.com/company/visit for more information.

- Stepwell light w/interior switch
- Golf bag storage compartment w/framework and straps to secure two golf bags (25P)

Optional Equipment

- Driver-side door w/power lock and power window (NA w/StudioLoft)
- Lower front protective mask (requires full-body paint)

Heating & Cooling System

- 14,800 BTU air conditioner w/heat pump
- 20,000 BTU low-profile furnace

Electrical System

- Service Center cable TV input, 30-amp. power cord, portable satellite dish hook-up
- AC/DC load center, 45-amp. converter/charger
- Auxiliary start circuit
- Battery disconnect system (coach)
- 2 deep-cycle, Group 24 RV batteries
- Automatic dual-battery charge control
- 3,600-watt Cummins Onan® MicroQuiet™ LP generator
- 1,000-watt DC/AC inverter
- Exterior AC duplex receptacle

Optional Equipment

- 3,200-watt Cummins Onan diesel generator
- 100-watt solar panel/battery charger

Plumbing System

Service Center color-coded labels, city water hookup/tank diverter fill, drainage valves, 10' sewer hose, exterior wash station w/lighted pump switch
- TrueLevel™ holding tank monitoring system
- Tankless water heater (25P)
- 6-gallon water heater w/electric ignition, 110-volt/LP (25T)
- Winterization Package w/siphon tube
- On-demand water pump
- Permanent-mount LP tank w/remote fill
- Water tank fill w/lockable door
- Heated drainage system
- Sewage pump macerator (25T)
- Holding tank flush system

Safety

- Child seat tether anchor (25P)
- LP, smoke, and carbon monoxide detectors
- 10 BC fire extinguisher
- Ground fault interrupter
- High-mount brake lamps
- Daytime running lights
- Fog lights

Warranty

12-month/15,000-mile basic limited warranty
36-month/36,000-mile limited warranty on structure
10-year limited parts-and-labor warranty on roof skin

Footnotes

1. The height of each model is measured to the top of the tallest standard feature and is based on the curb weight of a typically equipped unit. The actual height of your vehicle may vary by several inches depending on chassis or equipment variations. Please contact your dealer for further information.
2. The load capacity of your motorhome is designated by weight, not by volume, so you cannot necessarily use all available space when loading your motorhome.
3. Capacities are based on measurements prior to tank installation. Slight capacity variations can result due to installation applications.
4. Capacities shown are tank manufacturer’s listed water capacity (W.C.) Actual filled LP capacity is 80% of listing due to overfilling prevention device on tank.
5. Actual towing capacity is dependent upon your particular loading and towing circumstances, which includes the GVWR, C Gizk, and GCWR as well as adequate trailer brakes. Please refer to the Operator’s Manual of your vehicle for further towing information.
6. See separate chassis warranty.
7. See your dealer for complete warranty information.

Not all items available in combination. See dealer for details.

Winnebago’s® continuing program of product improvement makes specifications, equipment, model availability, and prices subject to change without notice. Published content reflects the most current product information at time of printing. Please consult your dealer for individual vehicle features and specifications.
