

Winnebago Industries - Specialty Vehicle Division

Handicap Accessible Motorhome Questionnaire

In order to help us better meet your expectations in a customized Ability Equipped motor home, please consider the following:

- 1) Please describe the wheelchair or scooter model with dimensions to be used in the motorhome:

- 2) If you are a full-time wheelchair user, will there be times when you will be traveling in the motor home by yourself?

YES

NO

If the answer to the above question is YES (and even if the answer is NO), please consider the following:

***ROOF VENTS:** As an option, electric roof-mounted vent(s) which are thermostatically controlled and operated by remote control can be installed to replace the roof vents that have the controls mounted up high on the ceiling. Please select the type of roof vent desired:

REMOTE CONTROL

STANDARD CEILING MOUNT

***TV/DVD player:** In many floorplan configurations, the television and DVD player in Winnebago Industries motor homes may be located up high. This may be true for the front lounge as well as in the bedroom areas. While a remote control will operate the television and DVD player, having the DVD player up high may pose a problem for playing DVD's. As an option, we can often install the DVD player in a lower cabinet for easier access. DVD player placement desired:

ACCESSIBLE LOWER CABINET

STANDARD PLACEMENT

***LIGHT SWITCHES:** The on/off switch for some of the ceiling-mounted lights throughout some motor homes may be located on the ceiling. As an option, the ceiling lights can be made operational by accessible wall mounted light switches. Please select the light switch placement desired:

WALL-MOUNTED SWITCHES

STANDARD PLACEMENT

***FAUCETS:** As an option, faucets with long lever handles can be installed in the galley and/or bath areas. An adjustable height, removable shower head is an option in the shower area. The adjustable shower head may use a single control on-off knob or a lever to control water flow. Faucet selections desired:

|---|---|
| <input type="checkbox"/> STANDARD FAUCETS | |
| <input type="checkbox"/> LONG LEVER HANDLES | <input type="checkbox"/> STANDARD HANDLES |
| <input type="checkbox"/> ADJUSTABLE SHOWER HEAD | <input type="checkbox"/> STANDARD SHOWER HEAD |

***MICROWAVE OVENS:** The microwave oven in many motor homes built by Winnebago Industries is usually built in an upper overhead cabinet above the stove top in the galley area. As an option, we can install a small microwave in a more accessible location, such as below the stove top where the oven is usually located. Relocating the microwave in the oven location will eliminate the option of an oven. Microwave installation desired:

- | | |
|--|--|
| <input type="checkbox"/> ACCESSIBLE LOCATION | <input type="checkbox"/> STANDARD LOCATION |
|--|--|

***SECOND DOOR:** When a second door is installed for wheelchair access, a person traveling by themselves will need to be able to open the door. As an option, a ROM *power roll-up* door can often be installed in many motorhome models we make. Or, if a manual swing style door is used with a platform lift, the door handle can be lowered slightly to make it easier to reach with a removable tether added to help close the door once inside the coach. (Note: The ROM roll-up door is not applicable with the SuperArm lift).

| <input type="checkbox"/> ROM POWER DOOR W/ REMOTE CONTROL |
| <input type="checkbox"/> MANUAL SWING STYLE DOOR W/ STANDARD HANDLE |
| <input type="checkbox"/> MANUAL SWING STYLE DOOR W/ LOWER HANDLE & TETHER |

***GENERATOR SWITCH:** The standard location for the generator switch can sometimes be in an inaccessible location. As an option, we can install a generator switch in the bedroom area, in the dash area near the driver, or another desired location. There can also be multiple generator switch locations, if desired. Please select the generator switch location desired:

- | |

3) Other items to consider, even if you are not traveling by yourself:

***MONITOR PANEL:** Location for the monitor panel can vary from model to model, but often the monitor panel can be in position that may be difficult to reach from a wheelchair. If required, we can lower the monitor panel for easier access as an option. Monitor panel location desired:

LOWER MONITOR PANEL

STANDARD MONITOR PANEL

***TOILET:** The toilet can be raised on a platform with assist bars placed where necessary as an option. Also, we can open the bathroom area up extensively for ease in maneuvering a wheelchair or scooter. Toilet options desired:

RAISED TOILET

STANDARD HEIGHT TOILET

ASSIST BAR(S)

NO ASSIST BAR(S)

***BATHING AREA:** Depending on the size of the motorhome you choose and the particular floorplan of your motorhome, different bath/shower options may be available such as a tub/shower, a standard shower equipped with shower bench, or roll-in style shower. Bathing option(s) desired (please indicate if assist bars are also required):

TUB/SHOWER STANDARD SHOWER W/BENCH ROLL-IN SHOWER

ASSIST BAR(S)

NO ASSIST BAR(S)

***ACCESSIBLE LIFT OPTIONS:** There are three (3) main types of lifts currently installed by Winnebago Industries from which to select. The recommended type of lift best suited for your motor home depends upon several factors:

- a) Your needs.
- b) The floorplan of the motor home.
- c) The desired placement of the lift.

COACH-LIFT

A Coach-Lift ® person lift uses a removable chair that rises on a lift tube and pivots on a swing arm to bring an individual inside/outside of the motor home. The lift tube is installed on the left side of the exterior door frame. This type of person lift is *not* designed to lift a wheelchair or scooter. www.coachlift.com

BRAUN or RICON PLATFORM LIFT

Platform style, fully automatic, stows inside vehicle -- applicable with many Winnebago Industries models which have enough room for the installation of a second door. This type of lift will lift an individual seated in a wheelchair or scooter. www.riconcorp.com www.braunlift.com

SUPER ARM LIFT

Non-platform style electric arm lift, can be used on widened standard entry door, stows inside vehicle – applicable with most Winnebago Industries models. This type of lift will lift an individual seated in a wheelchair or scooter. www.handicapsinc.com
