Take a Tour

We're proud of our process, state-of-the-art facilities and the people who make Winnebago Industries number one. We invite you to visit our factory in Forest City, Iowa, for a first-hand look at the dedication and technology behind every motor home we build.

Recognized Quality

The Recreation Vehicle Dealer Association annually rates RV manufacturers and awards the Quality Circle award to manufacturers who provide exceptional products, service and support. Winnebago Industries is proud to be the only manufacturer to receive this award every year since its inception.

Committed to Service

• 12-month/15,000-mile basic limited warranty
• 36-month/36,000-mile warranty on structure
• Standard 10-year limited parts-and-labor roof skin warranty
• Complimentary 24-hour roadside assistance program
• RV Technical Assistance Hotline
• RV Service Appointment Assistance
• Emergency Trip Interruption
• Emergency Message Service
• Nationwide Trip Routing
• Fee-Free Travelers Cheques
• TripSaver Fast Track Parts. TripSaver guarantees that in-stock warranty parts ship directly to your dealer within 24 hours.
• National dealer service network

WIT Club

Winnebago owners are like family. Joining the Winnebago-Itasca Travelers is a great way to meet and travel with other Winnebago enthusiasts.

Members enjoy:
• Caravans and rallies
• Local and state group activities
• RV travel benefits

Visit us on the web for more info on all of our motor homes, the latest product updates and a host of web-exclusive content.
You’ve found your Destination.

There’s a new breed of Class A motor homes hitting the road and the 2008 Winnebago Destination™ leads the way, giving you the option of a gas pusher or diesel pusher chassis. It’s the first coach to take full advantage of the all-new Workhorse UFO™ gas chassis and its powerful 8.1L, 340-hp rear engine. You can also choose the Freightliner® XC diesel chassis with a Cummins® 6.7L ISB diesel engine. Two innovative models are loaded with storage and contemporary features like beautiful curved cabinetry and a 7’2.5” ceiling height. For more power and more fun, make plans for a Winnebago Destination.
Wherever your destination, you’ll have all the comforts of home. Watch movies in full surround sound on the entertainment center, complete with a 30" TV, CD/DVD player and Home Theater Sound System. A 600-watt inverter lets you enjoy TV without shoreline or generator power. You’ll receive broadcast channels from an amplified antenna, or choose the available King-Dome® dual LNB satellite system* and receive digital satellite programming to two different receivers. Enjoy it all from the comfort of the Flexsteel® sofa or the UltraLeather™ Euro Chair.

Your meal selection will be limited only by your imagination in the full-featured galley. The 3-in-1 range/microwave/convection oven by Apollo® cooks and browns like a conventional oven in half the time. It includes a stainless steel cook top with three sealed burners. Plenty of storage is found in the contemporary cabinets that come in your choice of Honey Cherry or Honey Cherry with Washed Maple accents including a large pantry for all of your food.

*Digital satellite programming requires a subscription to a digital service provider.
The Winnebago Destination is more spacious by design. Only Winnebago Industries employs the SmartSpace™ design philosophy to make the most of the available interior space and amenities in each coach. Rethinking the way motor home features are packaged leads to innovative features like TrueAir® residential central air conditioning.

TrueAir uses a Coleman®-Mach® cooling unit that cools 40% faster and runs 10% quieter than traditional roof air units. The cooling unit is located in the basement, eliminating condensation runoff and creating a lower vehicle profile. A heat pump is also available to warm the coach on cool mornings without starting the furnace.

Other SmartSpace features include the OnePlace® systems center, PowerLine® energy management system and the TrueLevel™ holding tank monitoring system.

**WEB** **TRUEAIR**
Get residential cooling comfort from TrueAir residential central air conditioning.

**WEB** **POWERLINE**®
This energy management system monitors electrical usage and automatically cycles appliances on and off to prevent power overloads.

**WEB** **ONE PLACE**
This complete systems center places frequently used switches, gauges and controls in one central location.

**WEB** **TRUELEVEL** Eliminate tank-level guesswork with our exclusive TrueLevel holding tank monitoring system. It incorporates detector cells that detect liquid levels from outside the tank. No probes means no more corrosion, just accurate readings time after time.
The cab is geared for driver and passenger comfort alike with controls close at hand and a spacious area with storage and flip-up table tops for the passenger. The Flexsteel® cab seats are perfectly designed for extended trips on the road. Because of the mid-coach entry, the cab area provides a more comfortable and spacious setting with no need for a step-well cover.

The Destination is easy to maneuver using the rearview monitor with one-way audio and the available side-view video cameras. Flip a switch to light the auxiliary lamps to see the way when backing in the dark. A one-piece windshield gives you a complete view of the road.

The RV Radio® includes AM/FM stereo, CD player, weather band, and an auxiliary input for your iPod/MP3 player. Adjust the stereo using the steering wheel remote or the handheld remote from the living area.

Cab Seats Flexsteel cab seats come in UltraLeather and offer an available six-way power pedestal for the driver and an available foot rest for the passenger.

Rearview Monitor You’ll feel more confident when backing and maneuvering with the rearview monitor.
Sleep soundly

Make yourself at home in the bedroom featuring a queen-size bed or an available king-size bed (39W only). Beneath the bed on the 37G you’ll find easily accessible storage for some of your larger items. Windows on both sides of the bedroom create a spacious feeling and provide great cross-coach ventilation. Abundant cabinetry and a large wardrobe make it easy to pack for longer trips.

Wardrobe

Pack your clothes in a large wardrobe with extra drawers.

Underbed Storage

Lift the bed to reveal a hidden storage compartment that’s great for extra blankets and pillows (37G only).
Amenities everywhere

A walk-around queen-size bed and spacious flat-floor design help you feel right at home in the bedroom. The 39W offers a bench seat and an available king-size bed so you can sleep like royalty.

Catch the news before you snooze on the 20" LCD bedroom TV. It connects to the DVD player in the available bedroom stereo system for even more viewing options. The stereo system includes AM/FM radio, a CD player and alarm clock to get you up and ready for the new day. Connect headphones or an MP3 player for a more personal music experience.

Getting ready for a night out is a pleasure with a well-lit, mirrored vanity. The shower has a flexible showerhead to fit you perfectly.
Simple storage

There’s a place for everything in your Destination. Smart Storage™ provides large, pass-through storage bays for oversized items like chairs and golf clubs. Side-hinged compartment doors make loading those items even easier. The compartments feature a rotocast lining that is exceptionally strong and is easy to clean.

An exterior service center houses water and electrical components for quick and easy hookups at the campground. Large, color-coded labels make identifying connection points a snap. Use the QuickPort® service connection hatch to close the service door with hoses attached.

Control the automatic leveling jacks using the main controls by the entrance door or the additional switch in the service bay that lets you watch the jacks lower onto the jack pads.

Full-body Paint  Give your Destination a distinct look with a full-body paint scheme.

Exterior Storage  Smart Storage provides room for all your gear in pass-through storage compartments.

KeyOne  Open the entrance door, storage compartments and fuel door with the same key.

Service Center  A wash station lets you rinse off muddy shoes before entering the coach.
**Freightliner XC Diesel Chassis**

Diesel enthusiasts can choose the Freightliner XC chassis as the foundation of their Destination. Climb hills with ease using the 340-hp Cummins ISB 6.7L diesel engine with 660 lb.-ft. of torque.

A full-air braking system delivers excellent stopping power, including four-wheel anti-lock brakes for wet or snowy roads. You won’t even notice bumps in the road, thanks to the NeWay® front and rear air suspension.

- 27,910 lbs. GVWR
- Cummins ISB 6.7L diesel engine
- Touchpad shifter
- 55° wheel cut
- Allison® 2500MH Series 6-speed transmission
- Sachs Shocks
- 10,000 lbs. hitch

---

**Workhorse UFO Chassis**

Get pusher performance with the convenience of a gas engine. The all-new Workhorse UFO chassis gives you pusher power with a rear GM Vortec 8.1L gas engine. It delivers 340-hp and 455 lb.-ft. of torque for your toughest climbs. Combined with an Allison 2100 Series 6-speed transmission, the Workhorse UFO chassis brings the GVWR up to an impressive 26,000 pounds — the same GVWR of many traditional diesel pushers.

Enjoy a smooth ride over rough roads on a Hendrickson® suspension built exclusively for the UFO chassis. A Quadraulic™ braking system employs four-wheel disc brakes for short stopping distance and anti-lock braking in harsh conditions.

- 26,000 lbs. GVWR
- GM Vortec 8.1L engine
- Adjustable pedals
- Allison 2100 Series 6-speed transmission
- Touchpad shifter
- 55° wheel cut
- Bilstein® shocks
- 5,000 lbs. hitch

Winnebago motor homes are built by Winnebago Industries, the company that
defined motor homes. The company that built its reputation on quality construction.
The company that transformed the motor home concept into a way of life.

Today, Winnebago Industries brings that reputation for quality and its 49-year history
of motor home innovation to the design and construction of every motor home. It’s all
a part of SuperStructure®, our exclusive system of proprietary structural components
that instills each motor home with improved strength and durability.

Solid Foundation Steel
and aluminum truss work provides
a solid, flat foundation for the floor
and sidewalls. Winnebago Industries
gineers also take special care to
distribute the weight of components
to ensure proper handling and stability.

Interlocking Joints
The floor, sidewalls and roof are all
integ rally connected using interlocking joints.
This creates a coach body that acts as a cohesive unit for improved strength and durability.

E-Coating Winnebago Industries employs an exclusive 12-stage automotive-style dip tank process to apply an advanced electrodeposition coating on critical steel components for superior corrosion protection.

Thermo-Panel® Sidewalls Invented by Winnebago Industries,
Thermo-Panel construction combines a fiberglass panel, high-density, block-foam insulation and aluminum support structures to create some of the most durable, lightweight sidewalls in the industry.

Attention to Detail Whether it’s sending every coach through a high-pressure water tunnel to check for leaks or labeling each individual wire and bar-coding parts to save time and frustration during service, Winnebago Industries considers every detail to ensure your Winnebago motor home provides you with years of pleasure.

Strong as Steel Appliances are secured directly to embedded steel plates for added safety. Windshields are also mounted in steel with an automotive-style sealant; lesser designs use a rubber gasket to mount the windshield in fiberglass.

Fiberglass Roof The Destination features a crowned, one-piece fiberglass roof, backed with a 10-year limited parts-and-labor roof skin warranty. Fiberglass offers superior strength, attractiveness and durability over the rubber roofs found on many competitive models which can chalk, streak and degrade over time. Fiberglass also provides increased puncture and tear resistance.
